

Montana Information Technology Act (MITA)

CIO Presentation to the ITB
August 6, 2009

Purpose

- To examine the issues relative to the implementation of MITA and discuss future requirements and direction.

The Montana Information Technology Act

- Senate Bill 131, known as the Montana Information Technology Act, became effective July 1, 2001. It established the position of the CIO and the Information Technology Board.
- Legislative Audit of Enterprise IT Management – October 2006 – “the MITA Audit”
 - centralize management and control of IT
 - develop and document implementation plans
 - establish and document the process of using policies
 - establish and document procedures to maintain enterprise IT policies and standards
 - coordinate with OBPP to enforce the statutory requirement that new IT investments be included in the approved agency IT plans

MITA Issues

- What Works
- What Doesn't
- What's Missing

Future Action

- Organizational Structure
- Organizational Alignment
- Legislative Action to amend MITA

Discussion
